DETAILED ACTION

Response to Amendment

The following is in response to the amendment filed February 20, 2009.

Allowable Subject Matter

Claims 8-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 8-14 are allowed, because in a papermaking wire cloth comprising an upper fabric having making direction wires and cross direction wires, a lower fabric having making direction wires and cross direction wires, and wire bridges connecting the fabrics, the prior art does not disclose or suggest a combination wherein: the number of upper making direction wires is identical to the number of lower making direction wires, the number of upper cross direction wires is greater than the number of lower cross direction wires, the wire bridges of the upper cross direction wires extend within a pattern repeat at least over nine making direction wires and at most under one making direction wire, the wire bridges of the lower cross direction wires extend within a pattern repeat under at least six making direction wires and over at least two making direction wires, and between two making direction wires which extend over a cross direction wire at least one other making direction wire extends under the same cross direction wire.

Claims 15-17 are allowed, because in a papermaking wire cloth comprising an upper fabric having making direction wires and cross direction wires, a lower fabric having making direction wires and cross direction wires, and wire bridges connecting the fabrics, the prior art

Art Unit: 1791

does not disclose or suggest a combination wherein: the wire bridges of the upper cross direction wires extend within a pattern repeat at least over nine making direction wires and at most under one making direction wire, the wire bridges of the lower cross direction wires extend within a pattern repeat under at least six making direction wires and over at least two making direction wires, between two making direction wires which extend over a cross direction wire at least one other making direction wire extends under the same cross direction wire, and an upper making direction wire is bound to a lower cross direction wire such that the tying site of the upper making direction wire is located exactly between the tying sites of two lower making direction wires on the same cross direction wire.

Claims 18-20 are allowed, because in a papermaking wire cloth comprising an upper fabric having making direction wires and cross direction wires, a lower fabric having making direction wires and cross direction wires, and wire bridges connecting the fabrics, the prior art does not disclose or suggest a combination wherein: the wire bridges of the upper cross direction wires extend within a pattern repeat at least over nine making direction wires and at most under one making direction wire, the wire bridges of the lower cross direction wires extend within a pattern repeat under at least six making direction wires and over at least two making direction wires, between two making direction wires which extend over a cross direction wire at least one other making direction wire extends under the same cross direction wire, and a cross direction wire is placed additionally in the fabric and which joins an upper and a lower making direction wire within a pattern repeat within the fabric.

Art Unit: 1791

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed February 20, 2009 have been considered.

The substitute specification is acknowledged. No new matter has been added. The objection to the specification set forth previously is withdrawn.

The objection to the drawings set forth previously is withdrawn. Applicant has clearly pointed out where the claimed features upon which the objection was based can be found in the drawings.

Applicant's arguments and amendment to the claims have overcome the rejection set forth previously under 35 U.S.C. 112, second paragraph. Applicant has clearly set forth the subject matter which is regarded as the invention in the new claims.

Applicant's amendment to the claims has overcome the rejection set forth previously under 35 U.S.C. 102(b) over Quigley (US 6,227,256) for reasons set forth by Applicant and previously made of record by the examiner.

Art Unit: 1791
